Integrating addiction and mental health care

THE CHALLENGE

Mental health and addiction often overlap, yet siloed systems mean people with co-occurring needs struggle to access consistent, coordinated care.

OUR IMPACT

We promote holistic, integrated care by connecting services and supporting workers to meet the needs of people with both mental health and addiction challenges.

For more information, visit turningpoint.org.au/30-years-of-impact/health-care.

Hamilton Centre

Launched in 2022, Victoria's statewide specialist service for co-occurring addiction and mental health integrates clinical care with training, research, workforce development and system leadership.
