Guiding best practice

THE CHALLENGE

Health professionals need fast access to evidence and resources to deliver safe, effective care for people affected by alcohol, drugs and gambling.

OUR IMPACT

We create and share evidence-based guidelines and tools that support consistent, high-quality, person-centred addiction care across the health system.

For more information, visit turningpoint.org.au/30-years-of-impact/best-practice.

Mapping patient pathways to improve recovery

Australia's largest multi-site addiction outcomes study (796 clients, 2 states), mapping care pathways and directly shaping policy, service planning and funding.

Setting national benchmarks for AOD treatment

In 2017, Turning Point worked with the Department of Health to develop Australia's National Quality Framework, setting national benchmarks for safe, evidence-based AOD care.
